In the same year the treaty was signed, Congress passed the 1909 Rivers and Harbors Act which prohibited charging tolls on locks or canals built by the United States. The Panama Canal was the only exception. Tolls had been abolished on the Erie Canal in 1883 and the federal government had accepted from Michigan the St. Marys canals with the stipulation that they be available free of charge. When Congress approved the St. Lawrence Seaway, tolls were recognized as an exception to standard practice. The exception was noted as necessary because of

the international nature of the project. See House Public Works Committee Report on Wiley-Dondero Bill, H.R. 1215, 83d Cong., 2d sess., 1954.
